ABOUT COMPANY

At, J.K GRANITE EXPORT ,our story began in 2009 when we started as a “Merchant Exporter” from jalore the j k granite export .

We soon gained progress in sourcing of quality granite slabs. Our alliance with strategically located factories near quarries helped us in providing better materials competitively – which in turn fuelled our dreams further.

Our intense quality control measures coupled with immense customer centricity attitude has helped us in achieving our client’s trust. We have a set-up of multiple granite processing factories – at almost every strategically important granite in India.

Today with multiple factory locations, several production alliances, offices in all major granite cities of india , we at J.K granite – have established ourselves as one of the most reliable and highly customer centric company with an un-paralled edge on knowledge and ability to source process and supply over varieties of natural Indian Granites .
